How to Display a Facebook Live Event on Your Website

These instructions are written for use on an eCatholic website but can be modified and used on any website. For this example, we have used a Mass from St. Mary Cathedral.

Step 1

Open the page on your website where you will post the Facebook livestream video. If you don’t already have a page created, then create a new page on your website where you will display the Facebook video.

Step 2

Open Facebook and search for the St. Mary Cathedral Facebook page (or the Facebook page from which you want to stream). For this to work, the livestream must already be active on Facebook: https://www.facebook.com/smcaustin/
Step 3

Look for the 3 dots also called ellipsis in the top right corner of the feed. Click the ellipsis.
Step 4

Select the embed option from the dropdown menu
Step 5

Highlight and copy the embed code.

Embed Video

Copy and paste this code into your website.

Advanced Settings

St. Mary Cathedral
Austin, Texas
Step 6

Open the webpage where you will post the video. Click the `+Add Content` option in the bottom left side corner.
Step 7

Click the Social & Embed option on left side menu.
Step 8

Click the < > Embed button
Step 8

Drag the < > Embed button on to the webpage.
Step 9

The source code window will open.
Step 10

Paste the embed code in the source code window. Then click the Save button.
Step 11

The video will then appear on the webpage.
Step 12

Click the Title option to edit the text.
Step 13
Type in your new title.
Step 14

Click the Publish button in the bottom right hand side to publish your page.
Step 15

The video is now available on your website.
